

SELECT * FROM RESOURCETBL WHERE RATE BETWEEN 10 AND 20

ORDER BY RATE;

The screenshot shows a SQL query editor interface. The top toolbar includes icons for running queries, saving, and other database functions. The main editor area contains the SQL query: `SELECT * FROM RESOURCETBL WHERE RATE BETWEEN 10 AND 20 ORDER BY RATE;`. Below the editor, the 'Query Result' tab is active, displaying a table with 6 rows and 3 columns: RESNO, RESNAME, and RATE. The results are sorted by RATE in ascending order.

	RESNO	RESNAME	RATE
1	R100	attendant	10
2	R102	usher	10
3	R105	food service	10
4	R104	janitor	15
5	R101	police	15
6	R103	nurse	20
